

**ROLE:**

Laboratory Analyst to join our team on SECOND SHIFT (approximate hours 3:00pm to 11:30pm).

Position entails preparing and/or analyzing a wide variety of samples for elemental content using analytical chemistry methodology.

**Responsibilities:**

- Preparing and/or analyzing samples for elemental content
- Performing and documenting routine maintenance and calibration of instrumentation
- Documenting/recording raw data and results of analyses
- Executing procedures in accordance with the appropriate regulations

**Qualifications:**

- Ideal candidate will have previous analytical laboratory experience
- High school diploma with associate degree preferred, and/or one to two years related experience, or an equivalent combination of education and experience
- Good attention to detail
- Willingness to learn
- Strong organizational and multi-tasking skills
- Ability to see small objects and handle them appropriately (for example, weighing small amounts of sample into containers the size of a thimble or smaller)
